## **DETAILED ACTION**

### ***Response to Request for Reconsideration***

1. This action is issued in response to applicant's Request for Reconsideration filed 1/24/03.
2. Prosecution is reopened.
3. Claims 21-89, as amended, are now pending.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 21-89 are rejected under 35 USC 103(a) as unpatentable over O'Shaughnessy(US Pat. No. 6,317,726) in view of Black(US Pat. No: 6,012,042) and further in view of Melnikoff(US Pat. No: 5,784,696).

6. As per amended independent claims 21,44-45,57-58,65,81 O'Shaughnessy teaches a method of identifying financial instruments meeting predetermined criteria(Abstract)(entire document) consisting of retrieving data from at least one data source(Fig 1/1-1)(Fig 2/2-1)(Fig 3/3-1)(Fig 4/4-1)(Fig 5/5-1)(Fig 12) and processing the financial instrument data to identify values for a set of searchable parameters corresponding to the investment criteria for particular financial instruments included in the financial instrument data(Fig 1/1-2/1-4/1-6/1-10/1-8/1-12)(Fig 2/2-

2/2-4/2-6/2-12/2-14)(Figs 3-5). O'Shaughnessy does not specifically teach accepting user defined search criteria for the searchable parameters. Black teaches this(col 10 lines 57-67). It would have been obvious to one skilled in the art at the time of the invention to combine O'Shaughnessy in view of Black to teach the above. The motivation to combine is to teach an improved securities analysis system to facilitate the analysis of securities on a computer system that is user defined as enunciated by Black(col 2 lines 60-67)(col 10 lines 57-67).O'Shaughnessy does not specifically teach searching the values identified from the set of searchable parameters for values matchingthe user defined criteria. Melnikoff teaches this(Abstract)(col 5 line 63-col 6 line 3).O'Shaughnessy does not specifically teach identifying a set of financial instruments corresponding to values for the searchable parameters matching the user-defined search criteria. Melnikoff teaches this(col 5 line 31-col 6 line 40). It would have been obvious to one skilled in the art at the time of the invention to combine O'Shaughnessy in view of Black and further in view of Melnikoff to teach the above. The motivation to combine O'Shaughnessey in view of Black and further in view of Melnikoff is to teach a method for selection of groupings of securities based on risk definition and measurement as enunciated by Melnikoff(col 5 lines 25-37)(col 5 line 63-col 6 line 3).

7. As per amended dependent claims, 22-44,46-56,59-64,66-80,82-89 O'Shaughnessy teaches the trading of stocks(Abstract)(Figs 1-12) as well as bonds(Fig 17/17-2)(col 32 lines 18-30). O'Shaughnessy does not specifically teach the trading of derivatives and commodities. Black teaches the trading of commodities and derivatives including options(col 1 lines 41-45)(col 2

Art Unit: 3624

lines 42-67) utilizing a network(col 10 lines 43-56) which incorporates bid-offer spread(Fig 1).

O'Shaughnessey does teach stock volatility(col 11 lines 15-27)(col 12 lines 58-67) and Black teaches trading volume(Fig 1/12).It would have been obvious to one skilled in the art at the time of the invention to combine O'Shaughnessy in view of Black and further in view of Melnikoff to teach the above. The motivation to combine O'Shaughnessey in view of Black and further in view of Melnikoff is to teach a method for selection of groupings of securities based on risk definition and measurement as enunciated by Melnikoff(col 5 lines 25-37)(col 5 line 63-col 6 line 3).

*Response to Arguments*

8. Applicant's arguments with respect to claims 21-89 have been considered but are moot in view of the new ground(s) of rejection. However, the O'Shaughnessy reference is indeed prior art because it is a CIP of an application filed Dec 30,1997 which predates applicant's disclosure.Furthermore, Black was filed in 8/1996 which is also prior art.

*Conclusion*

9. **THIS ACTION IS MADE NON-FINAL.**
